

44 days of triumph and the number 44 symbolism

For some reason, when we think about Azerbaijan's triumphant victory in the 44-day Patriotic War, we tend to narrow down the symbolic essence of the number 44 in our minds. Of course, let's say from the beginning that all numbers, having their own energy, also carry a hidden meaning and essence

If we slightly simplify the number 44 in folklore and numerology (4+4), we will get eight as a result, which will show that the leader has high management ability, organizational talent and boundless ambitions. The number 8 also means orientation towards self-realization. On the other hand, each of the four in the number 44 needs to be refined. In numerology, it also translates into a person's destiny. In this case, the symbolism of these numbers proves that it is aimed at revealing the main aspects of our 44-day victory [4]. Various aspects of the activities of the President of the Republic of Azerbaijan, Commander-in-Chief Ilham Aliyev, based on the wisdom and heroism of the Azerbaijani people, the flexibility of our National Army, and the bravery of the brave sons of our nation, are reflected in these symbols. Ilham Aliyev, as the head of the country and Commander-in-Chief, was also well aware of the atrocities committed in Karabakh by Armenian separatists and terrorists who have occupied a part of our homeland for years. He witnessed numerous meetings, speeches, promises, cunning and ineffective negotiations, and the fact that the co-chairs of the Minsk group from the USA, France and Russia not only tried to solve the Karabakh issue, but also constantly tried to aggravate the situation. Although Ilham Aliyev, as the President of Azerbaijan, knew for a long time what these haters had done, he showed restraint, made efforts to form Azerbaijan as a powerful state, tried to strengthen the military potential of the Motherland, and persistently fought for the realization of the construction of an armed army.

While observing these processes, Ilham Aliyev came to appropriate conclusions and considered it important to make flexible decisions. From this point of view, the symbolism of the number 44 coincided with all the activities of the Head of State and the decisions he made. The number 44 is consistent with the successes of the brave warriors of our State and Army by influencing numerology with its perfect and complete system. The invincibility of our state and people, the bravery of our soldiers worried our enemies, all pro-Armenian forces, and took away their peace. 44 is the number of geniuses. The wise President of Azerbaijan proved this genius to the whole world with what he was capable of in the Armenian-Azerbaijani war. The number 44 is such a great number that our people, our army and our President turned the sound we have been waiting for for 30 years from fantasy to reality in 44 days. When the number 44 is mentioned in numerology, it is assumed that some important information can be given. And it is interesting that in our approach this has been sufficiently justified. On the night of the end of 44 days, we were also informed about the end of the war with the victory of the glorious Azerbaijani army and the capitulation of Armenia. The number 44 means stability in the state, iron law in the army, faith in victory in our soldiers, skill, success, integrity, internal discipline, etc. symbolized.

Qarabağ Azərbaycandır!
