The opportunity of history

History has given another chance to the people of Azerbaijan. A chance to reclaim our lands. A chance to win! Commander-in-Chief, President of Azerbaijan Ilham Aliyev this time against the Armenian provocation, which is always a ready pistol in the hands of our modern political world: - Shoot! - he said; gave the battle order. And the whole Azerbaijani society stood up, "War!" wrapped in his dress. The expected moment had come: Mother Earth should know, Motherland should hear! I am a soldier from today! Our Glorious Army, our troops armed with the most modern combat equipment, went on the offensive along the entire Karabakh front; Our soldiers who rushed forward with the spirit of the country, the determination to fight and win won their first victory! Karabakh is ours, it will be ours! The lands of Azerbaijan began to be freed from the occupation, village by village, from the valleys and hills, painful, painful, difficult as well as honorable, indispensable, absolute, a good news mission that the Azerbaijani people will be patient with... Since the 1990s, Ulu After the leader Heydar Aliyev, "Savior!" mission, the liberation of Azerbaijani lands, the chance to save Karabakh was written in the name of the President of the Republic of Azerbaijan, Ilham Aliyev. And on a larger scale, on more intense fronts; What is a "toy gun" that is the word of the President: we will show the aggressor such a face that he will not look at us again; we are talking about international diplomatic fronts, major political power centers of the world. As the big and small countries of the world come upon us with requests-grateful, immediate and non-negotiable Peace declarations, the Commander-in-Chief is introducing our rightful cause and our Word to the World: We do not want war, but we are ready for war! "We will win! Karabakh is ours! Karabakh is the land of Azerbaijan!".
