

### **They are trying to prevent our scientists from speaking abroad**

They are trying to prevent the speeches of our scientists abroad. Under the leadership of Commander-in-Chief Ilham Aliyev, the glorious Azerbaijani army continues to advance decisively despite all the difficulties at the front. Almost every day either strategic heights are liberated or our occupied villages are returned. This makes the people of Azerbaijan very happy and creates great enthusiasm. Our people have united around our president like a fist in the literal sense of the word: "Our people absolutely do not believe in the fake propaganda of Armenia. Because it is known to the whole world that the Armenians have been lying for centuries, that they have not fulfilled their promises, and that they are generally prone to crookedness, haram, and provocation, and the people of Azerbaijan know this very well. The Azerbaijani army literally proved itself as one of the best armies in the world in the second Karabakh war. This is the concrete practical fruit of the army building and army policy that Mr. President has been conducting in our country for years.

One of the most talked about issues is, unfortunately, the Turkish factor being misunderstood. Armenians draw attention to this and try to use it. But Azerbaijan has a brotherly relationship with Turkey. The world also sees that Turkey provides moral and political support to Azerbaijan. Under the guidance of the Commander-in-Chief, the Azerbaijani Army performs tasks at the front with its own arsenal and military strength. The establishment of temporary management bodies and commandants in the occupied territories by the decree of Mr. President is an admirable event. This means the return of Azerbaijan to the territories freed from de facto occupation, as well as the beginning of a new life. Several state structures named in the order are already creating their own institutions. Probably, other institutions will gradually form their own structures in Karabakh.

"It is a great honor for us that our border troops raised the flag of Azerbaijan in the border region with Iran: "Azerbaijani youth are performing their military service there. In general, the decisive moment of the war has arrived for Azerbaijan. and courageous steps show that the day when the tricolor flag of Azerbaijan will be waved in Khankendi, Shusha, according to the wishes of the Azerbaijani people, is not far away." Our scientists conduct research on a daily basis and report their informative attitude to the local media: "We have enough evidence to prove that Armenians are vandals, bloodthirsty, and terrorists. there are historical facts and evidences. Our books on monitoring evaluations related to refugees and displaced persons as a result of the first Nagorno-Karabakh war were published at the Institute of Law and Human Rights. The Institute of Architecture and Art was invaded in Nagorno-Karabakh in the areas where we have cultural and historical architectural monuments, he prepared research studies reflecting the aggression. The articles of our scientists are also published in foreign languages. We also have problems in this area. The press of foreign countries is not willingly interested in us.

However, as far as possible, our scientists try to publish our articles in foreign countries and to make our attitude known. In efforts to bring the truth about the war to the world media in foreign languages, we encounter a truly indifferent attitude. An important reason for this is that Armenians, Armenians of Armenian origin and pro-Armenians work with a large network in the board of directors of media organizations around the world and among their owners. As much as possible,

## *Qarabağ Azərbaycandır!*

they try to prevent our scientists from speaking their objective voice abroad. We have specific facts about this. At the same time, we are talking about another fact. We face some difficulties with translation. Despite this, we continue our activities to convey the truth about Azerbaijan and modern times to the world using all possible means." Azerbaijan is growing patriotic youth to be proud of: "This victory is created by our readiness for battle and the patriotism of our youth. Loyalty to our state, patriotism and high combat readiness - all three together are a great reason for us to advance on the front. I watch the interviews and addresses of the Supreme Commander-in-Chief Ilham Aliyev. Mr. President, in the truest sense of the word, shows great skill both in the political-ideological front, in information warfare, and in the field of direct military operations. Young people, even children, want to go to the front. Everyone who does not know the meaning of war, who has not reached military age, has a mission to fight for the homeland. On the rear front, I see a new generation of perfect, true Azerbaijanis, loyal to their state, people, president, and flag growing up".
